Distance Learning (DL) Requirements and Resources

Access on on-line is determined by the delivering college for each course. Please consult the starting and ending dates for your courses as published in this schedule.

24-hour Blackboard Technical Support
<http://www.athens.edu/blackboard/>
1-888-7-ATHENS

All students taking any class which delivers content over the Internet should review the instructions and requirements posted at <http://www.athens.edu/blackboard/>, including the following information:

- Login instructions
- Account details
- Browser requirements

Students are responsible for confirming that their web browser is properly configured by clicking the “test Browser” button at <http://athens.blackboard.com/> to verify proper configuration before the first day of class.

Athens State University incorporates the Blackboard Academic Suite as its official platform for on-line course delivery. Blackboard is a course management system designed to enhance the learning experience and promote collaborative engagement throughout the student’s educational career at the University.

All internet-based and blended courses require students to use Blackboard on a regular basis throughout the semester. Instructors employ Blackboard within their courses to varying degrees and may at their discretion enlist the following institutionally-supported software to further enhance their courses for the student’s benefit.

Respondus LockDown Browser is a downloadable application for taking Blackboard exams. If required by your instructor, please download LockDown from <http://www.athens.edu/blackboard/> and install on your computer. Successful installation of the software will result in the placing of an icon on

your computer’s desktop, which you must click to take your exam at the appropriate time. It is strongly suggested that you install the software several weeks before your first exam in order to sufficiently resolve any technical issues you may encounter.

Tegrity allows students to playback any class session or lecture recorded by their instructor, in part or whole. Audio and video can be streamed over the internet or downloaded to an external video player (iPod, MP3) for off-line studying.

If your instructor has provided video sessions for your review, these may be accessed by clicking the “tegrity” link/button in the Blackboard course menu.

Wimba is a rich array of collaborative tools that allow faculty to deliver the highly personal and lively nature of traditional classroom instruction to their students in an online environment. From voice to video, from podcasting to content authoring to instant messaging, Wimba works seamlessly within existing Blackboard

courses to further enhance your learning experiences.
