Get Your Facebook Profile Job Search Ready

33% of employers use Facebook to find job candidates. So, even if your Facebook profile is “private,” cleaning it up before job searching is still a good idea.

DELETE PARTY PHOTOS
Any photos that show you participating in questionable or illegal activities, including photos, tagged photos, status updates, or mentions should be removed from your page.

DELETE INAPPROPRIATE COVER PHOTOS
Simply put, take them down. Employers appreciate professional modesty and look for proof that candidates conduct themselves in everyday life with a dignity appropriate to the work environment. Cover photos are not private on your account and will make or break your first impression.

DELETE STATUS UPDATES
Remove anything personal that you don’t want your future employers to know about you. This includes deleting mentions portraying your current or previous employers in a bad light.

UPDATE FRIENDS LIST
Remove anyone you don’t know, don’t associate with anymore, or who frequently tags you in unprofessional photos or tags. You do not want that person’s inappropriateness to affect your job search.

EXTRA TIP:
It’s a good idea to also clean up your profile information when job searching. Changing your about me and quotes section to reflect your best written cover letter will help you attract recruiters, not turn them away. Including links to your LinkedIn profile and digital portfolio is also a good idea.
